PETITION TO THE LEGISLATIVE ASSEMBLY OF PRINCE EDWARD ISLAND

We petition the Legislative Assembly of Prince Edward Island as follows:

To encourage government to make the necessary legislative changes to allow liberalisation of PEI's electricity grid;

To urge government to do everything possible within its jurisdiction to resist Maritime Electric's diesel-fuelled proposal that is currently before IRAC, and to ensure a modern, affordable, safe, and reliable electricity grid for all Islanders, present and future.

This section will be cut and retained by organizers so that they can contact you with updates about this petition.
